PROSUB

DYE SUBLIMATION SYSTEM

*A winning combination of products
commercial dye sublimation production solution*

Blue Print's dye sublimation production solution combines a software rip developed specifically for inkjet sublimation printing, the latest Mimaki JV Series inkjet printers and a proven combination of dye sublimation inks and transfer paper. Produce stunning wide format flags & banners, sportswear, corporate wear or unique fabrics designs for fashion and furnishings with Blue Prints total production solution.

ProSub Software RIP

- True 16bit rendering for superb tonal colour blends
- Fully PostScript 3.0 compatible
- Intuitive graphical interface
- Comprehensive colour management functions
- Functional variable data options
- high processing speeds and unparalleled output quality

Mimaki JV33 or JV5 Printer

- Based on latest Epson high speed print head technology
- Entry level JV33 or high speed JV5 option
- Superb output quality
- Includes auto media take-up unit
- Sealed continuous ink supply system

KiwaJet Dye Sublimation Inks & Qualimage Transfer Media

- High density inks
- New improved environmentally friendly formula
- Reduced water content for faster drying
- Superior vibrancy and colour yield
- Dimensionally stable media

*Small or large format,
promotional banners to sportswear.
Blue Print can tailor a dye sublimation
production package to meet
any requirement.*
